

Prahari — workflow & integration

Two paths. Both end on the same hash-chained audit log.

Never print a plate it cannot read

Below the pixel floor, or with the readers in disagreement, it says so.
A wrong plate on a police report is worse than no plate.

The account that configures it cannot watch through it

SYSTEM_ADMIN holds config and audit, and is refused live data, alerts and route.
Administering a surveillance system and using one are different jobs.
